Election/Restrictions

1. Applicant's election with traverse of Group II in the reply filed on 7-27-05 is acknowledged. The traversal is on the ground(s) that all the claims could be examined without undue burden. This is not found persuasive because the argument does not address the basis for the restriction and election of species.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 14-24, 30-37 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over GB 2130192, for reasons of record.

It is agreed that the GB reference teaches a silicon impregnated porous silicon carbide however the claims are rejected over the intermediate, before the body is impregnated by the silicon. The silicon carbide porous body before silicon impregnation taught by the GB reference is not patentably distinguishable from the instant claims.

4. Claims 30-37 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Japanese document 10-228974 and 7-328360.

Japanese document 10-228974 teaches a silicon carbide body having a mean porosity of 15-40 microns and is recrystallized.

Japanese document 7-328360 teaches recrystallized silicon carbide having an average pore diameter of 20-40 microns.

Many of the claims fail to set forth what impurity is being limited as well as Fe and Ni is not listed in the Japanese documents and therefor is not present. The terminology "article" and "wafer boat" with out any claimed structure is not considered to distinguish from the Japanese documents.

It is well settled that when a claimed composition appears to be substantially the same as a composition disclosed in the prior art, the burden is properly upon the applicant to prove by way of tangible evidence that the prior art composition does not necessarily possess characteristics attributed to the CLAIMED composition. In re Spada, 911 F.2d 705, 15 USPQ2d 1655 (Fed. Circ. 1990); In re Fitzgerald, 619 F.2d 67, 205 USPQ 594 (CCPA 1980); In re Swinehart, 439 F.2d 2109, 169 USPQ 226 (CCPA 1971).

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
